

SPRING/SUMMER 2027 COLLECTION

Material, light & innovation

Milan, 20 June 2026 — **Ten C's S/S 2027** collection, designed by **Alessandro Pungetti**, is the result of extensive research and experimentation with materials. At the heart of the project is the industrialization of an **innovative garment-dyed titanium nylon polyester fabric**, developed after over a year of research and destined to mark a new chapter in the brand's material evolution.

The titanium fabric takes shape in three iconic pieces—the **Jeans Jacket**, the **Alpen Jacket**, and the **Windproof Anorak**—and is features a colour palette inspired by nature: Pompeii red, sandy shades, and the warmth of Sienna. Traditional hues reinterpreted through the dyeing process, which generates iridescent highlights and a new three-dimensionality of colour.

The result is a dynamic balance between memory and innovation: living surfaces, sensitive to light and movement, that redefine the concept of natural colour through a technological lens.

Alongside the garment-dyed titanium, the collection introduces a new **"dust" dye**: an experimental treatment based on powders that settle on the fabric's surface, giving the garments a slightly worn, parchment-like appearance. The result maintains consistency with the natural palette, yet enriches it with a deeper, tactile dimension.

A signature element of the collection is the **9oz OJJ fabric**, reinterpreted for summer with a new lightness that does not compromise its distinctive texture. It's used for a jogging suit, a new field jacket, and a bomber jacket: standalone pieces yet part of a coherent look. The material is further enhanced by two-tone prints that amplify its visual and chromatic impact, and also features in trousers and Bermuda shorts for a complete, versatile wardrobe.

Outstanding among the new materials is **Nyfoil**, garment-dyed **metal coated nylon** featuring a titanium-effect internal coating that creates complex metallic highlights that shine through the matte exterior. This technical dimension is complemented by more compact, authentic fabrics, such as garment-dyed worsted gabardine, used for military-inspired pieces reinterpreted with new volumes.

Lighter versions of the same models are created with an extremely lightweight nylon-cotton blend, which maintains their form while transforming their weight and feel, making the garments almost impalpable.

Alongside technical outerwear, the collection further develops the urban explorer concept, in keeping with the winter season. Volumes are lighter, materials become more breathable, while keeping their functional and protective features intact. The collection is presented in Cloud Dancer and mud black tones.

In this context, the **Skye Ten Anorak** evolves into a lighter version, crafted from transparent nylon and garment-dyed Tactel, also available in an all-Tactel variant.

The focus on military-inspired menswear, a cornerstone of the brand's identity, continues to be reinforced. Field jackets, overshirts, and trousers are reworked with new weights, volumes, and materials, maintaining a consistent yet constantly evolving aesthetic.

The colour range expands to include blue, khaki, beige, sand, off-white, orange-red, periwinkle, and black, enhanced by sprays and two-tone finishes that intensify the material's depth.

The result is a streamlined, layered collection, in which each piece is conceived as an evolution over time: a balance between function, innovation, and the memory of the material, redefining a man's wardrobe through living, evolving surfaces.

About Ten c

TEN C - The Emperor's New Clothes - is part of the Veneto-based FGF INDUSTRY SPA group headed by Enzo Fusco. The brand, initially known for its no logo luxury outerwear made with the iconic exclusive patented fabric, OJJ (Original Japanese Jersey), has been engaged for several seasons in the challenge of developing a total look range. The brand is currently distributed in 120 selected boutiques and multi-brand stores around the world, 80% of which are overseas. www.tenc.com; [@ten_c_official](https://www.instagram.com/ten_c_official)
