

av vattev is London based brand created by Antonio Vattev, a Central Saint Martins graduate with experience as a designer for Lanvin and Saint Laurent.

The brand's aesthetic is built upon Antonio's personal drive in building a community and exploring the past, present and future with no shortage of optimism. There is always something emotional and futuristic to the world of
av vattev.

Mixing modern luxury and traditional sportswear, Antonio creates a dialogue of subculture, heritage and futurism;

"The whole concept behind my brand is to create modern but timeless garments." says Antonio.

Inspired by different movements in music and culture each collection comes with a strong storytelling line. The goal is to create a whole av vattev universe exploring sounds, vision, and touch.

"We want people to experience all of these elements through my brand rather than just a single clothing piece."

Sustainability is one of the main focuses of the brand. 90% of the collections are made of deadstock fabrics, organic and upcycled materials and zero-waste techniques.

"It's not about where you take things from, but where you take them to."
